# About ITEX

The International Invention, Innovation, Technology Competition & Exhibition (ITEX) is an annual exhibition which features the best innovations from Asia and beyond. Initiated by the Malaysian Invention and Design Society (MINDS) in 1989 as MINDEX, today ITEX is the region's leading exhibition to showcase new inventions, technologies and products, targeted at securing investment, manufacturing and commercialisation prospects and partners.

The exhibition features inventions across 15 exhibit classifications & seven competition categories related to innovation or technology. ITEX is Malaysia's longest-running invention, innovation, technology competition & exhibition.

## **YB Datuk Chang Lih Kang**

**Minister, Ministry of Science,  
Technology and Innovation (MOSTI)  
& Patron for ITEX 2026**

As Patron of ITEX, it is my honour to welcome innovators, researchers, industry leaders, investors and international delegates to this distinguished platform of invention and commercialisation.

Over the years, ITEX has grown into a respected and credible platform that advances ideas from concept to real-world application. More than an exhibition, it is a catalyst for scientific excellence, technological advancement and cross-border collaboration.

This year's focus on Artificial Intelligence, STEM-driven innovation and social inventions reflects Malaysia's forward trajectory. AI and emerging technologies are reshaping industries and redefining productivity, but progress must be guided by responsibility, inclusivity and strong governance. At the same time, strengthening our STEM ecosystem remains fundamental to building national resilience and long-term competitiveness.

From the Ministry's perspective, innovation must be anchored in purpose. It should uplift communities, enhance healthcare, protect our environment and expand opportunities for future generations. Technology must ultimately serve humanity.

Guided by the National Science, Technology and Innovation Policy (NSTIP), MOSTI is committed to positioning Malaysia as a regional hub for research excellence and high-value, innovation-driven industries. ITEX supports this national aspiration by connecting talent, ideas and investment — transforming promising prototypes into scalable, market-ready solutions.

To our inventors and investors, I encourage you to look beyond accolades and recognise the enduring value within these innovations. Your partnerships are essential in translating ingenuity into meaningful economic and societal impact.

To our international participants, thank you for choosing Malaysia as your partner in innovation. Your presence strengthens our shared commitment to advancing science and technology for the greater good.

As Patron, I remain steadfast in supporting platforms like ITEX that uphold excellence, integrity and commercial relevance. May this exhibition continue to elevate Malaysia's leadership in innovation — where ideas converge, partnerships are forged, and progress benefits society at large.

I wish all participants every success.

## Academician Tan Sri Emeritus Professor Datuk Dr. Augustine S.H. Ong

Founding President of Malaysian  
Invention and Design Society (MINDS),  
and Joint Organiser of ITEX

It is my great honour to welcome distinguished inventors, researchers, heads of institutions, industry leaders, young innovators and investors to ITEX and WYIE.

Every invention begins with a simple but powerful belief — that tomorrow can be better than today. Across nations and generations, we are united by this conviction. In an era shaped by complex global challenges, the responsibility to invent is, ultimately, a responsibility to humanity.

This year's theme, **“AI Unleashed: Pioneering Research and Innovation with Generative AI,”** reflects a defining moment in our technological journey. Artificial intelligence is no longer a distant frontier; it is present and transformative — reshaping industries, accelerating discovery, and redefining the way we live and work. Yet, technology alone is never sufficient. It must be guided by wisdom, ethics, and purpose. When AI is unleashed responsibly, it becomes not just a tool of efficiency, but a force for societal progress.

At the same time, we must recognise that innovation is not confined to laboratories or algorithms. Social inventions — those that strengthen communities, empower the underserved, enhance accessibility, and elevate quality of life. True advancement is measured not only in technological sophistication, but by meaningful human impact.

This edition marks a significant milestone as the largest ITEX to date, **featuring over 1,000 inventions from 17 countries and regions with 70% ready to be commercialised.** This scale reflects a growing commitment to research, creativity, and problem-solving. ITEX has become a meeting ground of minds without borders — where ideas are validated, collaborations are forged, and pathways to commercialisation are unlocked. WYIE, in turn, stands as a powerful reminder that innovation has no age limit, and that nurturing young inventors is an investment in our collective future.

Recognition is important. Achievement is commendable. But the true measure of innovation lies beyond medals — in lives improved, industries transformed and communities strengthened. When ideas move from concept to application, from prototype to purpose, invention fulfils its highest calling.

To all who have travelled from near and far — thank you for your boldness to create, your discipline to refine, and your commitment to building a better world. To the mentors, educators, partners and investors — thank you for turning ideas into impact.

As the exhibition begins, I wish all participants the very best of luck. May your courage be loud, your ideas be bold, and your breakthroughs be just the beginning.

## Dato' Vincent Lim President of C.I.S

Greetings to all Innovators, Investors, and Change-Makers,

Welcome to ITEX and WYIE, incorporating AYIE and MYIE.

At its heart, innovation is about people — those who create, those who enable, and those who invest in turning ideas into real-world impact.

ITEX 2026 reflects a clear evolution in the innovation landscape. Artificial intelligence is now deeply embedded across industries, accelerating discovery, improving precision, and reshaping how value is created. Yet even as technology advances, our responsibility remains unchanged: innovation must serve people, strengthen industries, and deliver meaningful progress

This year, we are proud to present highest number of submissions to date - **over 1,000 inventions from 17 countries and regions with 70% ready for commercialisation**. For investors and industry partners, this represents a pipeline of ready-to-deploy ideas with real market potential.

Spanning **15 invention classifications** — from sustainability, agriculture and healthcare to advanced manufacturing and smart technologies — ITEX continues to demonstrate that innovation is no longer confined to experimentation. It is increasingly defined by scalability, relevance, and commercial readiness.

More importantly, ITEX exists as a bridge: between inventors and industry, between prototypes and production, and between innovation and investment.

This year also marks the introduction of **iCAP (ITEX Commercialisation Acceleration Programme)**. Designed to accelerate market conversion, iCAP connects selected inventors directly with investors, venture capitalists and industry partners through **INNOPITCH** and curated business matching sessions. The objective is clear — to move promising ideas beyond visibility into viability, partnerships, and market entry.

Alongside ITEX, WYIE brings together **638 local and international teams from 10 countries and regions, including 51 Malaysian schools across 7 states and territories**. WYIE is a platform cultivated for the inventors of tomorrow. Through STEAM education, it builds curiosity, sharpens critical thinking, and develops the discipline to solve real-world problems in a rapidly evolving technological era.

To our inventors, investors, educators, judges and partners — thank you for your commitment to building an ecosystem where innovation is enabled.

ITEX 2026 is not an endpoint. It is a platform for conversion — of ideas into investment, of innovation into industry adoption, and of ambition into measurable impact.

Because the future is not something we wait for. It is something we create — responsibly, intelligently, and together.
